resume.niarisa.com | job@niarisa.com

Objective

C# Software Engineer with 5+ years of experience developing, testing and maintaining business-critical software applications in financial, pharmaceutical and television industries.

Experience

SOFTWARE ENGINEER | PHARMSTANDARD | JANUARY 2023 – PRESENT

Backend developer of the internal application framework based on ASP.NET Core. This includes base microservices (authentication, messaging, etc) as well as infrastructure libraries (REST client, remote data loading, etc) and base framework code meant to be used by all in-house applications.

Additionally, I mentor junior developers and developers moving from other development stacks.

Technology stack: .NET 7, ASP.NET Web Api, Entity Framework Core
Database: PostgreSQL
CI/CD: GitLab
Logging: Elasticsearch
Testing: XUnit, Moq

SOFTWARE ENGINEER | GAZPROM-MEDIA | FEBRUARY 2020 – SEPTEMBER 2022

Lead developer of the in-house automated broadcast graphics placement solution. The system has been running in production since February 2021 and since then has been successfully and failure-free serving 30 countrywide television channels 24/7.

Technology stack: .NET 5, ASP.NET Web Api, Entity Framework Core, ADO.NET, DevExpress, RabbitMQ, Oracle Database
Database: Oracle
CI/CD: JetBrains TeamCity, Microsoft Azure DevOps Server
Logging: Elasticsearch
Testing: Internal tool for automatic broadcast graphic algorithms and broadcast playlist testing

SOFTWARE ENGINEER | T1 CONSULTING | MARCH 2018 – FEBRUARY 2020

Outsourced developer for financial institution. Part of a team developing custom features for Infor CRM and integration bus solution for it.

Technology stack: .NET Framework 3.5, ASP.NET, SalesLogix Application Architect, WCF, ADO.NET, NHibernate
Database: Oracle
